Dimensions (mm)	Case A	Case B
Diameter (E):	35	45
Height (C):	64	65
Top Width (A):	35	45
Bottom Width (B):	33	43

Notes:

- NOMINAL DISCHARGE CURRENT (I_n) (kA):** It is the peak value of the current through the device having a current waveshape of 8/20 μ s where the device is capable of discharging 15 times.
- MAXIMUM DISCHARGE CURRENT (I_{max}) (kA):** It is the peak value of the current through the device having a current waveshape of 8/20 μ s where the device is capable of discharging once.
- MEASURED LIMITING VOLTAGE (MLV) (V):** Maximum residual voltage after the application of 8/20 μ s impulses at nominal discharge current.
- MAXIMUM CONTINUOUS OPERATING VOLTAGE (MCOV/U_c) (Vac):** It is the maximum root-mean-square (rms) voltage that may be continuously applied to the device.
- MAXIMUM CONTINUOUS OPERATING LOAD:** 8 A for "SPD-277S-xxkA"

RoHS

UL US

OVERVIEW

- IP67, optimized for use in outdoor applications
- Protects against surges in accordance with UL1449 and IEEE C62.41.2.C
- 90°C high temperature flameproof enclosure
- CAUTION: Only for use with universal input voltage LED drivers (120 to 277 Vac)

APPLICATIONS

- Additional level of protection from dangerous power line transient in commercial and industrial applications
- Area & Roadway lighting
- Factory, Warehouse, and Distribution Center lighting
- Sports & Stage lighting
- Airports & Dockyard lighting

10 kA/kV Surge Protector, Parallel Connection

Input Voltage (Vac)	120 to 277

IMPORTANT INFORMATION:
 The SPD-277S-20KA-EILR is shipped with the LED indicator not soldered to the surge protector. Please solder the Red, Blue and Black wires of the LED indicator to respectively the Red, Blue and Black wires coming out of the surge protector.

RoHS c US

OVERVIEW

- CAUTION: Only for use with universal input voltage LED drivers (120 to 277 Vac)
- IP67, optimized for use in outdoor applications
- 90°C high temperature flameproof enclosure
- 12 A maximum continuous operating load
- Remote EOL (End of Life) bi-color LED indicator:
 - Green LED On: the device is functional and operating.
 - Red LED On: the device has reached its end of life.

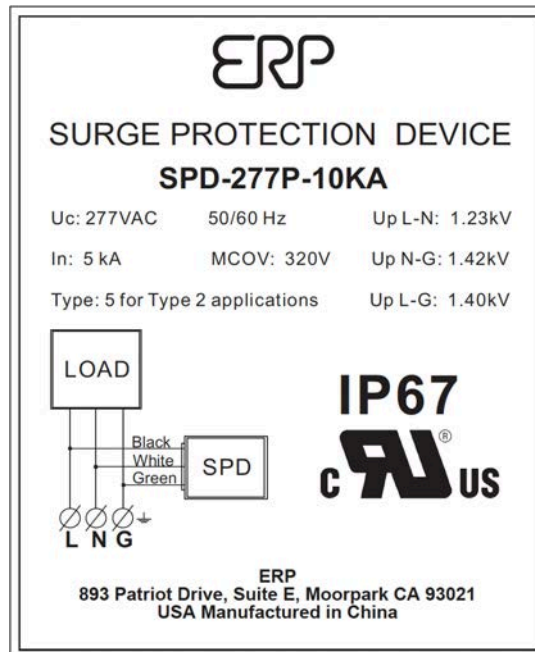

APPLICATIONS

- Additional level of protection from power line transient in commercial and industrial applications
- Area & Roadway lighting
- Factory, Warehouse, Industrial lighting
- Sports & Stage lighting
- Airports & Dockyard lighting
