Section 2: Declaration of TSCA Compliance

Toxic Substances Control Act (TSCA)

The Toxic Substances Control Act (TSCA) is a US federal chemicals management regulation. Multiple sections of TSCA outline substances and substance groups that are restricted and/or reportable based on their properties, posing unreasonable risk to humans and the environment, as identified by the EPA. Some of the chemicals with restrictions can be used in certain scopes or with applicable exemptions. This declaration indicates whether a TSCA restricted substance is contained or not contained, without consideration of thresholds. The Declarable Substance List is available for download from the Assent platform.

On January 6, 2021, the U.S. Environmental Protection Agency (EPA) issued final rules under Section 6(h) of the Toxic Substances Control Act (TSCA) for five persistent, bio accumulative and toxic (PBT) chemicals which includes:

Substance Name	CAS Number	Restricted Since
